SAFETY AND SURFACING SHEET (COMMERCIAL PLAY AREAS)

SUPERVISED

SUPERVISED

FOR UN-SUPERVISED AREA APPLICATIONS:

- A use zone of 36in (910mm) around all components of play structure.
- Separate from the play equipment for older children (2-5; 2-12; and 5-12 yrs)
- Since the highest elevated play surface is 7.5" (190mm), commercial resilient surfacing is not required. However, do not install on asphalt, concrete, packed earth, or other hard surfaces.
- If using loose-fill surfacing, install and anchor the equipment first before adding the loose-fill.
- If using unitary surfacing, install the surface first, then install and anchor the equipment.

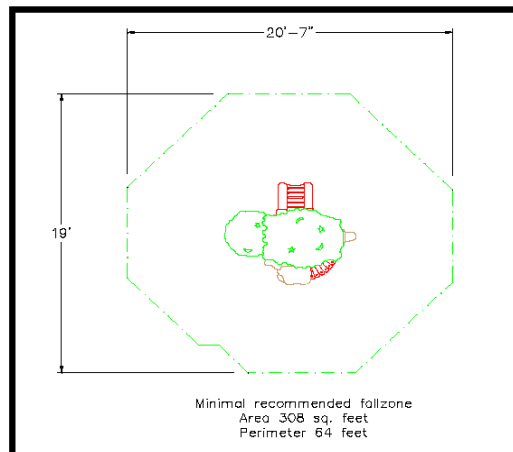

UN-SUPERVISED

UN-SUPERVISED

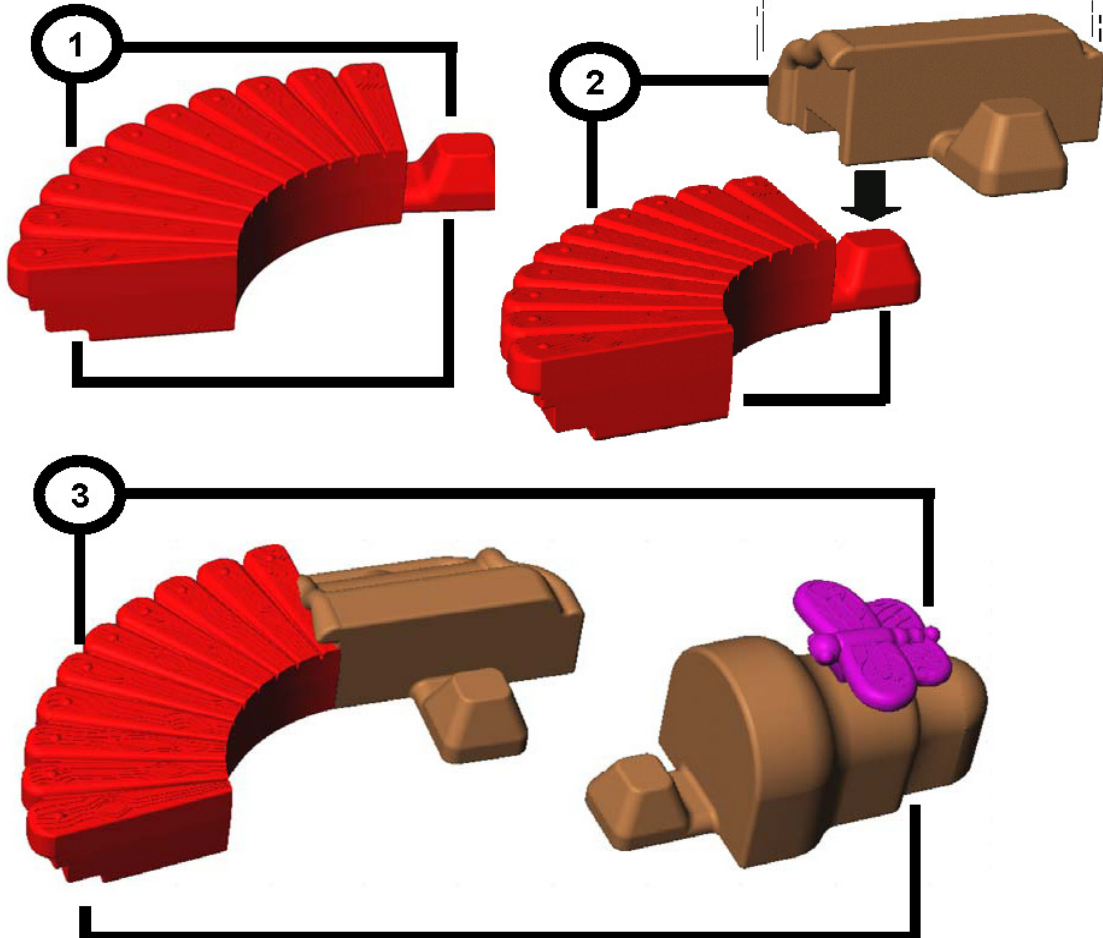

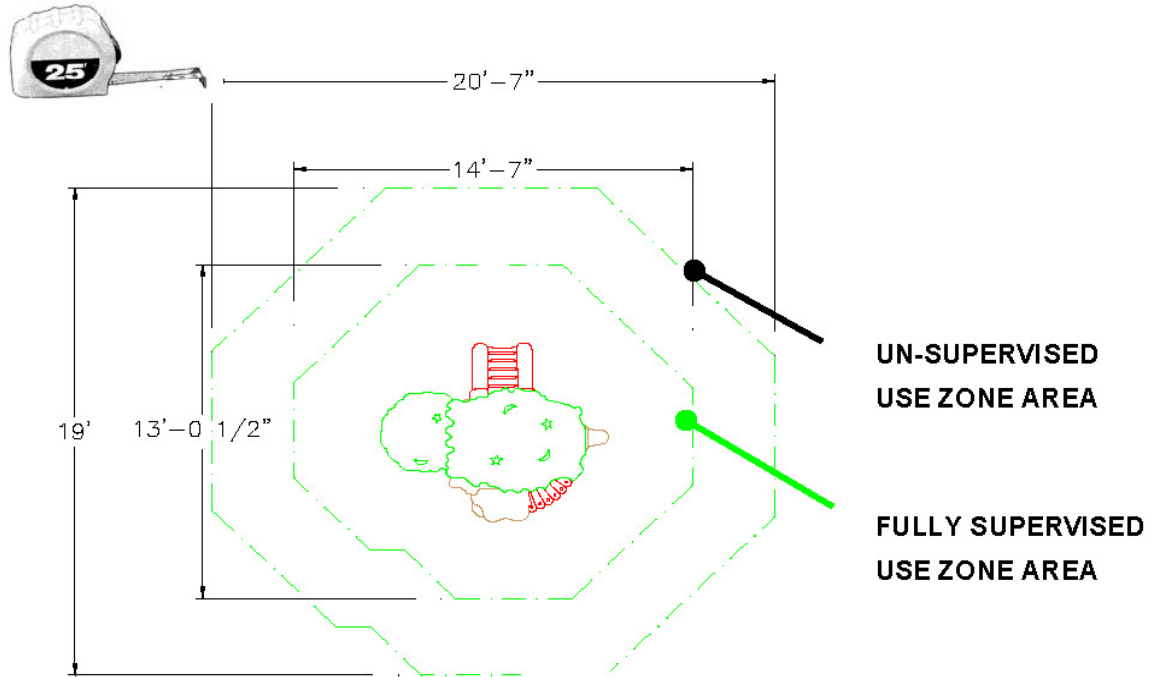

FOR UN-SUPERVISED AREA APPLICATIONS:

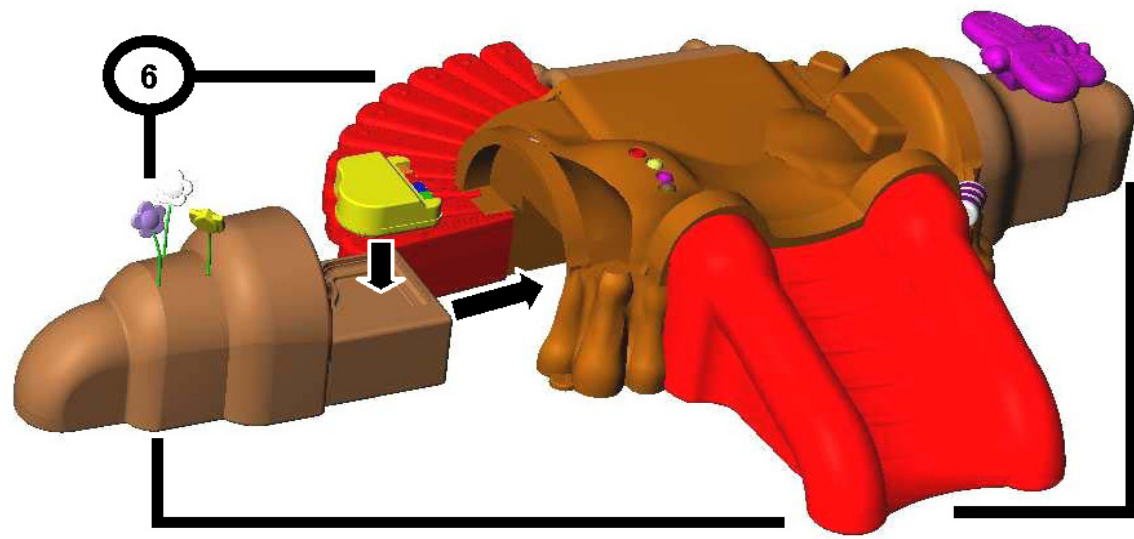

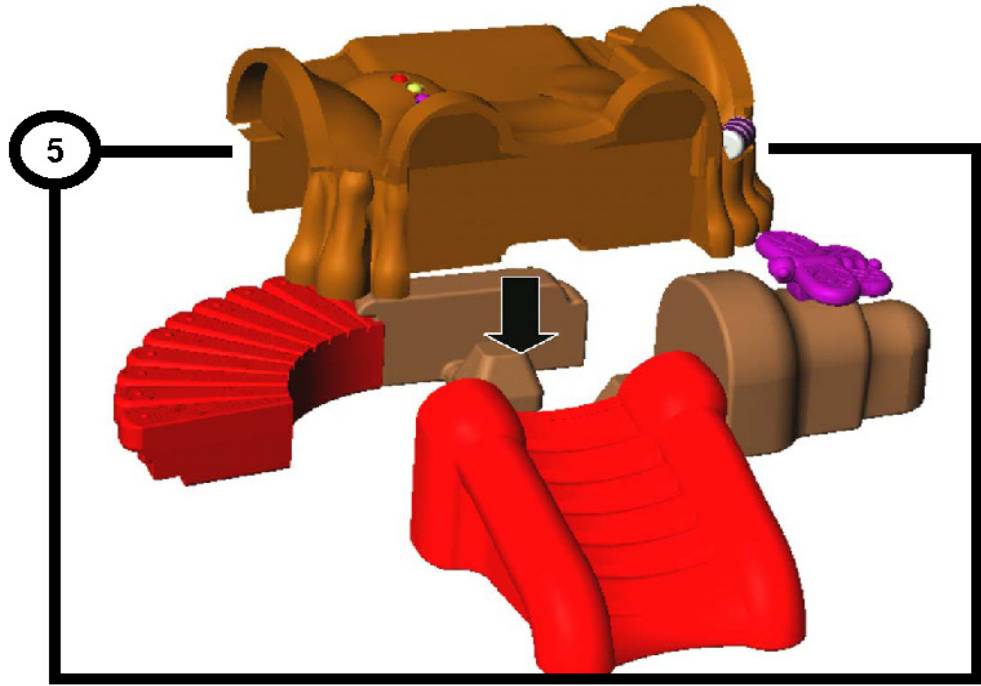

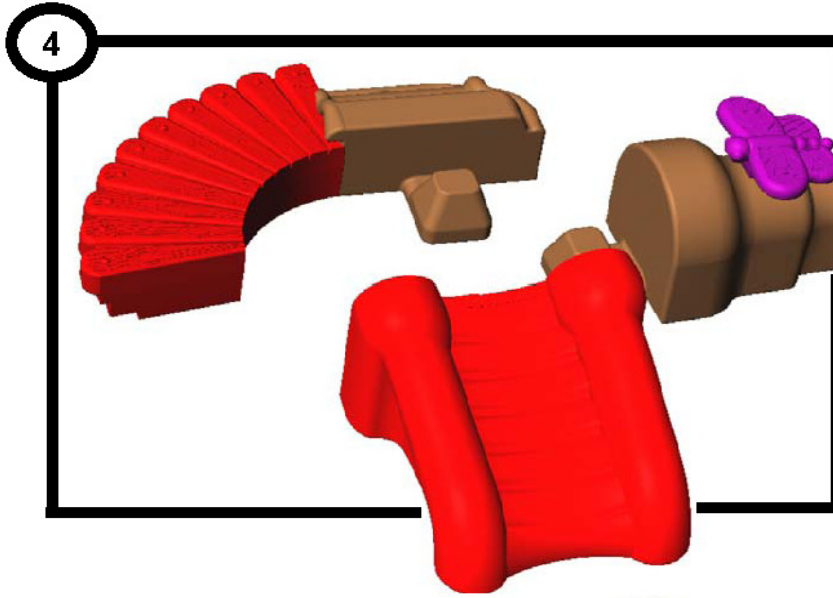

- A use zone of 72in (1830mm) around all components of play structure.
- Separate from the play equipment for older children (2-5; 2-12; and 5-12 yrs)
- Since the highest elevated play surface is 7.5" (190mm), commercial resilient surfacing is not required. However, do not install on asphalt, concrete, packed earth, or other hard surfaces.
- If using loose-fill surfacing, install and anchor the equipment first before adding the loose-fill.
- If using unitary surfacing, install the surface first, then install and anchor the equipment.
